

My Findings –

1. Majority of the population was unfortunately not able to survive
2. Females had higher chances of Survival
3. The greatest number of deaths occurred in class 3, but the second most survival rate was observed in class 3 only
4. The highest survival rate was observed in class 1
5. Most of the people who survived and not survived were around 25-30 years of age
6. People who paid more fare had more chances of Survival
7. Highest Positive Correlation with the Survival Rates were found out to be with Fare and Parch
8. Highest Negative Correlation with the Survival Rates were found to be with Sex and then PClass
